

TRIPOLYMER TANK MEDIA

TANK ABANDONMENT

MADE EASY

Tripolymer® Tank Media offers a hassle-free and cost-effective method to safely abandon underground oil, gasoline or chemical storage tanks. Local and state regulatory agencies nationwide consider Tripolymer Tank Media the safest and best method for in-place, below-ground oil tank abandonment solution.

WHY CHOOSE FOAM?

To prevent collapse and dangerous sinkholes, underground tanks must be properly removed or filled. Removal and traditional filling methods like sand or cement can be costly, time consuming and can cause expensive damage to the surrounding property. Developed in 1972, Tripolymer Tank Media's trade secret foam has been used for over 45 years as a durable and easy-to-install abandonment solution. It is:

INERT

NON-FLAMMABLE

ENVIRONMENTALLY SAFE

**LIGHTWEIGHT
AND STRONG**

NON-TOXIC

**QUICKLY AND
CLEANLY INSTALLED**

Tripolymer Tank Media is a phenolic-based, methylene-linked, synthetic polymer developed specifically for tank abandonment – it is not a polyurethane foam. TTM is not made with any petro chemicals and can even absorb any oil remaining in a tank and hold it indefinitely without sustaining any damage to its cellular structure.

HOW TRIPOLYMER TANK MEDIA WORKS

STEP 1

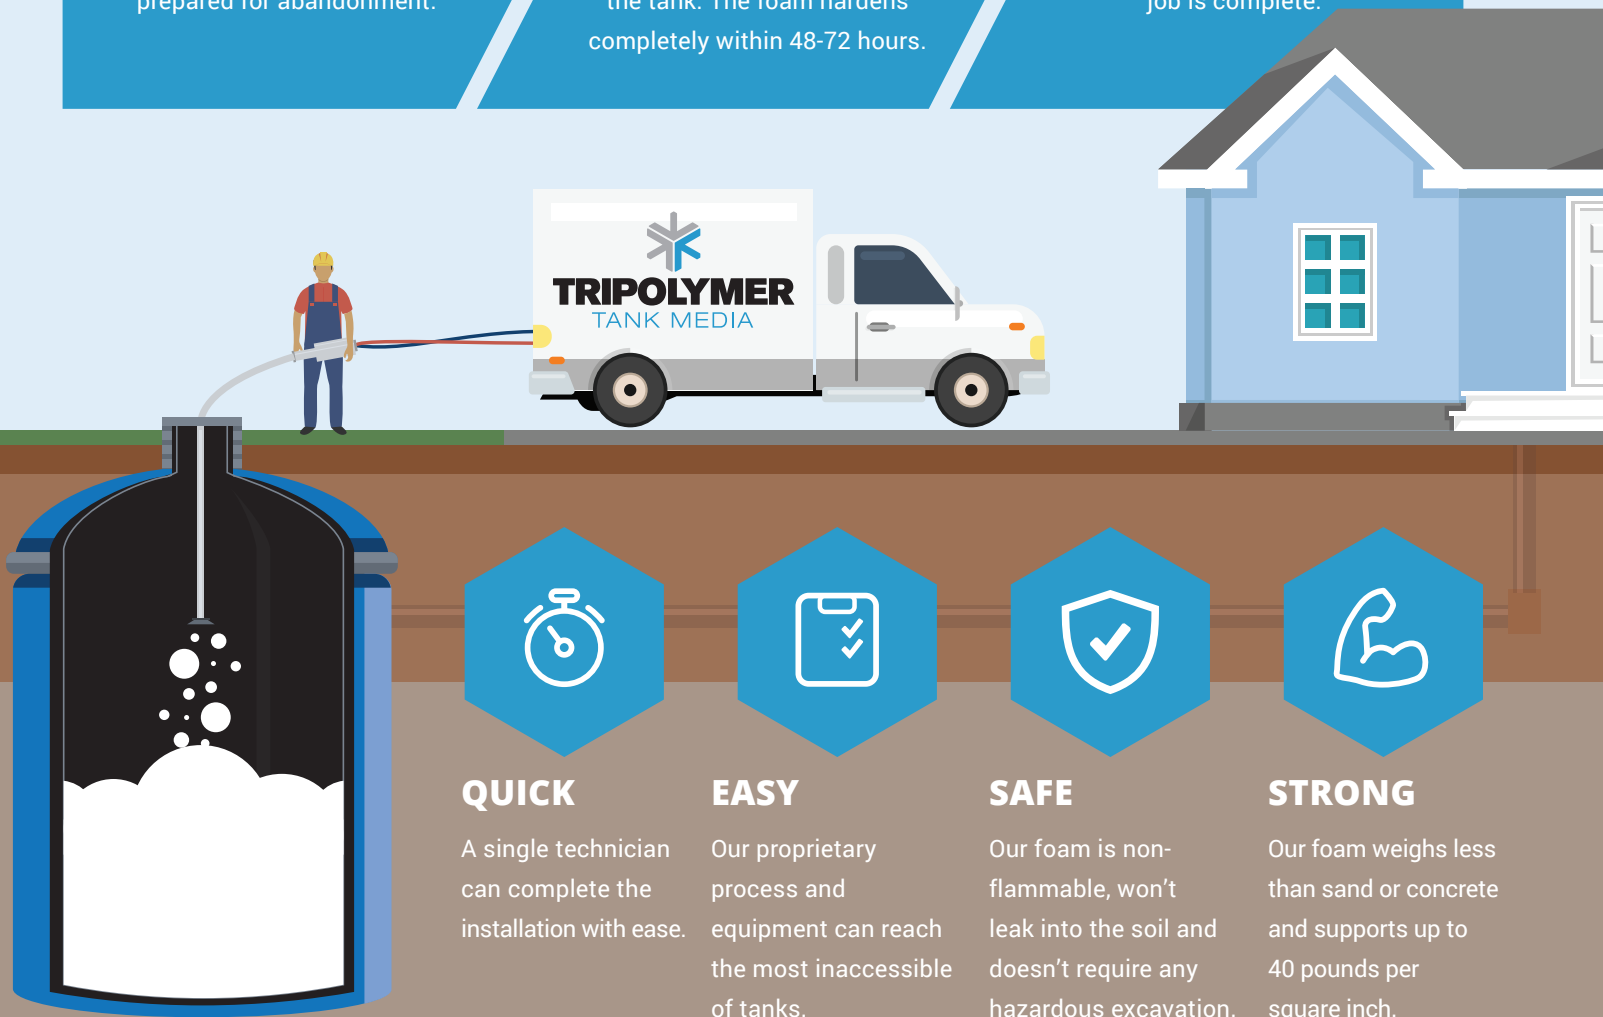

The oil, gasoline or chemical tank is emptied, cleaned and prepared for abandonment.

STEP 2

The technician injects foam through the fill pipe into the tank. The foam hardens completely within 48-72 hours.

STEP 3

Once the tank is full, vent and fill pipes are removed and the job is complete.

QUICK

A single technician can complete the installation with ease.

EASY

Our proprietary process and equipment can reach the most inaccessible of tanks.

SAFE

Our foam is non-flammable, won't leak into the soil and doesn't require any hazardous excavation.

STRONG

Our foam weighs less than sand or concrete and supports up to 40 pounds per square inch.

MAKE YOUR NEXT TANK ABANDONMENT PROJECT HASSLE-FREE

In the growing underground tank abandonment industry, Tripolymer® Tank Media stands alone as a trusted, safe solution to any tank abandonment issue. Its simple installation process helps keep labor and cleanup costs low while ensuring a lasting abandonment solution.
